Ivy Clad Buildings.

So long as the walls of a building are sound and the bricks or stones, well cemented together, offer no fissures or cracks for the plant to force its way into, there is nothing whatever to fear. Should the ivy, however, find an opening, and so thrust itself into the wall, the natural and continuous expansion of its parts will tend to loosen the stones and hasten the decay of the

A fair growth of ivy on sound walls that allow of no advances beyond the superficial attachment of the claspers, or aerial roots, as they are called, is altogether beneficial. It promotes dryness and warmth, counteracts the corrosive action of the atmosphere and is at once a shelter and an ornament.

These aerial roots are not sources of nutrition, but merely serve as mechancontention that they sap the whole of the moisture from mortar, leaving it excessively dry and crumbling, has Washington, July 13. - President therefore no foundation in fact.-London Standard.

A Disguised Toast. States officers at Buckingham palace on Thursday night last: "I thank your their mess, for, though a splendid admajesty most cordially for your kind miral, he was not popular in the navy message, and sincerely and gratefully appreciate the courtesies which the officers of our navy have received at the hands of your majesty and the English people."

Interval was not popular in the havy on account of a certain shyness and want of tact with those about him. The chaplain, who was a protege of his lordship, was mortified at this and depleted by the control of the courtesies which the officers should drink the lavy on account of a certain shyness and want of tact with those about him. The chaplain, who was a protege of his lordship, was mortified at this and depleted by the courtesies which the officers should drink the lavy on account of a certain shyness and want of tact with those about him.
